

Kevin Olfield, Senior Planning Engineer, American Water

Kevin Oldfield is a recently hired Senior Planning Engineer with American Water. He works with American Water's State engineering teams to identify and recommend projects to ensure the long-term reliability and sustainability of their drinking water systems. Prior to joining American Water, Kevin worked for Steven Winter Associates in New York City, where we designed and oversaw the implementation of energy efficiency upgrades to existing building's mechanical systems. He also worked with the Mayor's office and local utilities to develop incentive and training programs to support the city's ambitious efficiency and sustainability goals. He hopes to bring that experience to American Water to support the company's ongoing leadership in sustainability and environmental responsibility.
